

VOLVO CONSTRUCTION EQUIPMENT

CARETRACK

**FASTER INFORMATION.
BETTER PLANNING.
SMARTER WORK.**

YOU CAN WITH CARETRACK.

YOU CAN SAVE FUEL.

How can your Volvo dealer help?

CareTrack is more than just a telematics system because it comes with a wide range of value added services delivered by your Volvo dealer. After activation your dealer will continue to work with you and CareTrack, providing powerful solutions driven by real data.

With advice, analysis and support offers such as Customer Support Agreements and MATRIS Analysis, your Volvo dealer can work with you to turn CareTrack information into business solutions.

With CareTrack as part of your business you have the power to make the most of your Volvo machine, so talk to your dealer today to find out what CareTrack can do for you.

What is CareTrack?

CareTrack is the Volvo Construction Equipment state-of-the-art telematics system. It is standard equipment on most new larger Volvo machines* and new machines come with a 3 year activation at no charge. CareTrack can also be retro-fitted to a range of later model Volvo machines.

With CareTrack as part of your machine, unlocking the benefits of this intelligent piece of equipment could not be easier – just ask your dealer to activate it to get started.

CareTrack is designed to work with the electronic control system in your Volvo machines, providing the information which can help you optimize productivity and increase machine utilisation.

*In markets where CareTrack is available

YOU CAN REDUCE COSTS.

YOU CAN MAXIMIZE PROFITABILITY.

How does it work?

Your Volvo machines are equipped with an integrated GPS receiver, modem and antenna. Using this technology, your machine data is then transferred to a central database via GPRS/GSM mobile network or satellite. GPS is also used to detect the exact location of your machines.

All you need is an internet connected computer and your personalized and secure user log-in to access information about your Volvo machines, wherever you are.

Managing your equipment today and planning for tomorrow becomes easy with critical information streamed to your screen in easy to understand formats.

What information does CareTrack give me?

Once CareTrack is activated you will have a wealth of machine information at your fingertips, such as:

- Machine utilization reports
- Fuel consumption reports
- Daily hours reports
- Location reports
- Service maintenance reminders

CareTrack gives you the information to stay updated and in charge of your fleet – for better planning and smarter work. With CareTrack you have the insight needed to take improving actions that can have a real impact on your business.

VOLVO CONSTRUCTION EQUIPMENT

A close-up, black and white photograph of a Volvo logo on a piece of construction equipment. The logo is a circular emblem with the word "VOLVO" in a dark rectangular bar across the center. The emblem is mounted on a metallic, rectangular plate. The background shows the curved, metallic surface of the equipment, with some motion blur suggesting it's in use.

Volvo Construction Equipment is different. Our machines are designed, built and supported in a different way. That difference comes from an engineering heritage of over 175 years. A heritage of thinking first about the people who actually use the machines. About how to help them be safer, more comfortable, more productive. About the environment we all share. The result of that thinking is a growing range of machines and a global support network dedicated to helping you do more. People around the world are proud to use Volvo.

Not all products are available in all markets. Under our policy of continuous improvement, we reserve the right to change specifications and design without prior notice. The illustrations do not necessarily show the standard version of the machine.
